MINIPIN

Automatic Microneedling Therapy System

- Minimally invasive procedure for skin and fine needles make small punctures on the skin layer.
 - Skin's self healing process starts with producing more collagen and elastin.
- Also lots of active ingredients are penetrated into a deep layer of skin.

01 The only microneedling device with Clinical Data

Reliability is obtained from clinical trials that demonstrated pore reduction with only 4 times uses.

Improved pore size by 17.81%

02 Cosmetic absorption increased 500%

12 Pin stimulates the skin 3,500 times a minute creating 42,000 micro-holes in the epidermis layer to help the active ingredients of cosmetics penetrate deep into the skin

03 Exclusive ampoule for Microneedling Therapy System

2 ampoules specialized for microneedling treatment

Moisturizing/Elasticity **Wrinkle/Pore Care**

There are other cosmetics for pre/post care like serums, cream and mask sheets

04 Certification and Patent
